What makes somewhere a good place to live?

In the news this week

Scientists in Australia have discovered that human beings lived in high mountain caves nearly 20,000 years ago. They found tools, burnt wood, and other artefacts deep inside the caves of Australia's Blue Mountains, showing that people once cooked and lived there. The discovery is one of the earliest records of people living within this mountain range. The caves were likely a safe and useful place to shelter during cold winters in the mountains.

Things to talk about at home ...

- > Why do you think people chose to live in mountain caves? Share your response with someone at home. Do you think it's important to learn about the homes of people from the past?
- > Considering where you live, what are the things you need to live a comfortable life in your home? Have these things changed over time?
