What is the best way to support people who need extra help?

NIHR

In the news this week

New AI-supported glasses to help people with dementia or memory problems have won a £1 million prize. The glasses, made by the company CrossSense, can recognise objects and show labels or give spoken instructions to help people remember what things are and what to do. They use an AI assistant that learns how each person lives and adapts to their needs over time. Early tests show these glasses could help wearers feel more confident and independent in their daily lives.

Things to talk about at home ...

- Share your overall opinion on the glasses, do you think they are a good idea?
- In your opinion, is it better for people to get help from technology or from other people? Why?
- How might these glasses make someone feel more confident or independent?
- What technology do you use at home to help you? How does it help?
